EMERGENCY CARE VS. URGENT CARE

When your pet is sick, injured, or just off enough that you know that something isn't quite right, it can be difficult to tell whether the situation requires immediate medical attention. Of course, some signs are clearer than others—think bleeding, open wounds, or continuous vomiting—but not all conditions are as obvious.

Emergency Care

ADVANCED ANIMAL CARE RICHMOND

Emergency care is required for any life-threatening injury or illness that requires immediate hospitalization.

Urgent Care

ADVANCED ANIMAL CARE
BEREA

Urgent care falls
between emergency
care and regular vet
visits. Issues that
need immediate
medical attention
but aren't necessarily
life-threatening

"I know something's wrong with my pet and it needs to be checked out by a vet ASAP."
